

B.A. In Psychology

Psychology is the study of human behavior and of the internal and external patterns that affect others and us. These factors are analyzed by psychologists using the scientific method. The findings from this research make the courses in Psychology interesting, informative, and relevant. You can use what you learn in psychology. Courses range from General Psychology, which is available as a part of the common core for all students, to Child Psychology, Educational Psychology, Social Psychology, Experimental Psychology, Statistics, Personality, Abnormal Psychology, internship experiences, etc. Each course provides options that help to make the Cheyney University student better rounded.

In addition to these options, we offer an exciting major that can prepare students for graduate education in any of the broad areas of psychology including: clinical, experimental, physiological, drug and alcohol counseling, marriage and family therapy, child development, educational psychology, industrial psychology, social work, and a number of additional areas.

A major in psychology can also be an asset in business, the health sciences, in effectively developing a family, and in the other helping professions. While it is possible to enter some of these fields with a Bachelor of Arts degree, we encourage our students to enroll in graduate study to open an even wider range of exciting psychology-related careers to them.

PSYCHOLOGY CURRICULUM WORKSHEET

Social and Behavioral Sciences Department

Bachelor of Arts Degree
